NAKO MOLOKELE (JUNIOR)

JUNIOR SOFTWARE DEVELOPER | FULL-STACK DEVELOPMENT & PROJECT LEADERSHIP

Johannesburg South, South Africa | 069 869 1961 | juniornako@icloud.com | github.com/juniorrsnvl

PROFESSIONAL PROFILE

Third-year BSc IT (Software Engineering) student with hands-on experience leading development tasks and coordinating software delivery while building mobile apps, web systems and REST APIs. Skilled in backend integration, authentication, PostgreSQL, sprint planning, GitHub workflows and staging deployment. Seeking junior software developer, technical project coordinator or graduate opportunities.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Dart, SQL, HTML, CSS
Frameworks & Mobile: FastAPI, NestJS, React Native, Expo, Flutter
Backend & Data: REST APIs, PostgreSQL, Supabase Auth, Row-Level Security, Pydantic
Tools & Delivery: Git, GitHub, Render, Neon, Cloudflare Pages, Figma, ClickUp, task tracking, testing

SELECTED PROJECTS

NOURISHZA | Full-Stack Developer & Project Lead | Oct 2026

- Led a seven-day MVP development sprint, organising implementation and testing while building a South African nutrition app with React Native, Expo, NestJS and Supabase.
- Built authenticated REST API integrations and PostgreSQL data flows with Row-Level Security for profiles, food and water logs, and saved meal plans.
- Delivered seven-day meal planning, grocery estimates and weekly progress; tested nine key user journeys and managed Git version control.

HER HEALTH | Lead Backend Developer & Project Coordinator | Client Healthcare Project

- Led backend integration work using FastAPI, PostgreSQL and REST APIs to connect Flutter patient and admin applications within a four-person team.
- Coordinated tasks, implementation progress and stakeholder changes; developed authentication, patient workflows and a billing MVP.
- Managed GitHub workflows, testing and staging delivery; deployed backend to Render, database to Neon and Flutter web interfaces to Cloudflare Pages.

DASHFREELANCE | Independent Web Project

- Built and launched a responsive South African freelancer marketplace frontend using HTML, CSS and JavaScript; handled UI/UX, GitHub workflow and hosting.

EDUCATION & CERTIFICATION

BSc Information Technology (Software Engineering) | Eduvos | Third Year, Expected 2027
AI Project Management Certificate | Oxford Home Study Centre | 2025

ADDITIONAL

Valid driver’s licence | Access to reliable vehicle | Own laptop | Open to developer and project coordinator roles
